1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murakami et al in view of either Balkanski et al or Saishi et al.

Rejection grounds continue to be set forth in the previous office action (Paper No. 8, Paragraph 6). It is noted that independent claims 1 & 9 add the detail of original claim 7; however, the feature is shown in Murakami et al's Figs. 29(b) and 28 (half right). Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to combine either Balkanski et al or Saishi et al's "rounding" and "shifting" features in Murakami et al, thereby making the claimed invention, because the proposed device a multiplication device having a dual path for most significant product & least significant product and "rounding" & "shifting" features as claimed.

3. Due to the new grounds of rejection cited above, that the office action is NON-FINAL.
